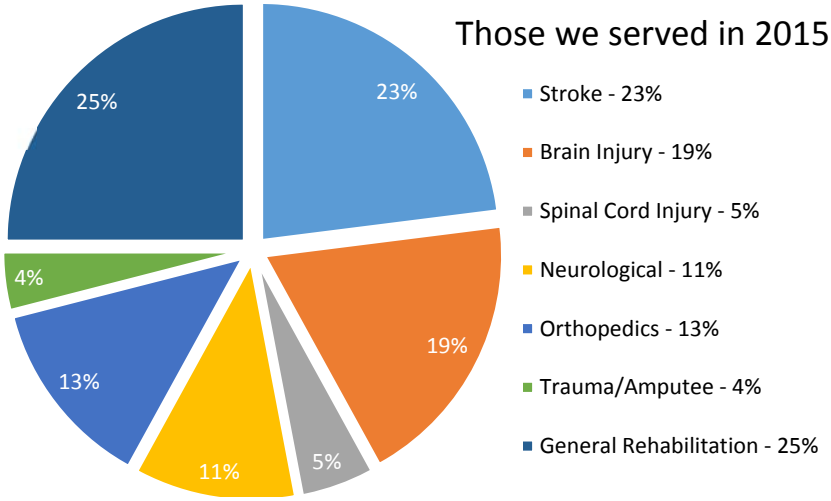
Sharing Our Performance with the Community

January – December 2015

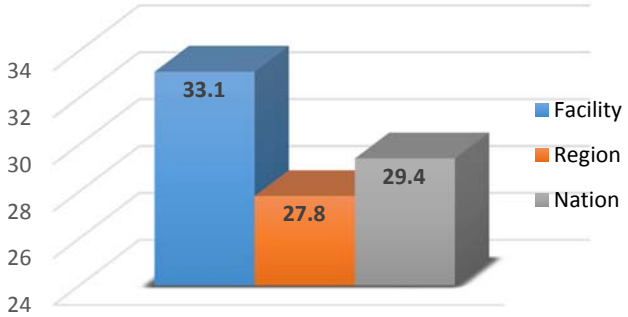
Stroke Specialty Program

During 2015, Community Rehabilitation Hospital served **1,205 patients, including 279 patients with the diagnosis of stroke,** while providing three hours of skilled therapy per day, five to six days a week.

Our team continues to deliver high-quality rehabilitation care by setting standards and exceeding regional and national figures. Our quality indicators for gain in function, discharges to the community and length of stay, inspire our team to strive for medical excellence.



Functional Independence Measure (FIM®)* Gain – Admission to Discharge



**FIM-Functional Independence Measurements – a measure of a patient's functional level consisting of 13 Motor and 5 Cognitive Measures. FIM is scored on a 0-7 scale with 7 being total independent, 1 being total assistance/dependent, and 0 being unable to test. Data gathered from Uniform Data Systems Rehab Matrix Report for Calendar Year 2015. FIM is a registered trademark of Uniform Data Systems for Medical Rehabilitation. All Rights Reserved.*

Discharge to Community
