

Did You Know?

An average of 18 people die each day from the lack of available organs for transplant. Approximately every 36 hours one is a child

Approximately 1,000,000 tissue transplants are performed annually

90% of Americans say they support donation, but only 30% know the essential steps to take to be a donor. You can register your decision at www.donatelifeindiana.org

Organ Donation Statistics

All statistics are for calendar year 2008

Clinical Triggers for Organ Donation:

Call when your patient meets one of these triggers:

- Vented patients with a GCS of 5 or less
- Before any withdraw of life support. Call at first mention from family or physician

One organ donor can save 8 lives.
