

We will be asking all participants to wear a **mask while not working out on the machines. We will also check **temperatures** as they come into the facility.**

We will be providing individual spray bottles for members to use while they are working out. These bottles will be refilled and disinfected when they are returned.

We have set up proper **social distancing by marking off or moving equipment on the main exercise floor and have marked off social distance circles in the group exercise classroom.**

We will be going around every hour and cleaning exercise equipment, door handles, hand sanitizer dispensers and other places people may have touched to ensure proper cleanliness.

Thank you for your continued support through this time and we ask for your cooperation in making this a **clean** and **safe** facility.
