

## Summary of 2024 Formulary Changes

Community Health Network reviews and updates the formulary on a regular basis. The following pages contain the upcoming changes **effective January 1, 2024\***.

*\*All positive changes are effective January 1, 2024 for both current and new users. If you use a drug marked as a negative change, it will not be effective until April 1, 2024. If you are going to be negatively impacted, you will receive a letter from EpiphanyRx. That letter will indicate what other drugs are available at a lower cost.*

### About the 2024 Summary of Changes list

This list shows all the drugs that may cost you more in 2024 (those moving from a lower tier to a higher tier), drugs may cost you less (those moving from a higher tier to a lower tier), and drugs that will no longer be covered by the plan.

You can search for a drug name by clicking on the magnifying glass icon on the top right of the PDF document or by pressing the **Control + F keys** on your keyboard. After typing in the drug name, click **Search** to find your drug.

Below is a list of the columns displayed on the top of each page, and what it means:

Column Name	Description
Drug Name	Brand (tradename) of the drug (if generic is not available), or the generic name (if available)
Drug Category	Description of the drug's therapy class
2023 Formulary Tier	This is the current formulary tier in 2023
New Tier	Indicates the new tier for the drug effective Jan 1, 2024*  All positive updates (lower cost share) are marked in <b>green</b> , and any higher cost share (negative changes) are highlighted in <b>pink/red</b>  Tier 1: lowest cost share tier Tier 2: preferred brand Tier 3: non-preferred brand, higher cost share NC: not covered; exception process is available if formulary options are not clinically appropriate
Lower Cost Alternatives	Shows a similar drug that is covered at a lower tier (lower cost) to you. You can share this information with your prescriber if you want to pay a lower cost share.
